

BRIEF CIPHER

MYSTERY DESIGN GAME

BY: RYAN MENZILDJIAN

GAME COMPONENTS

- Deck of over 100 categorized cards
- Dry Erase Board
- Trifold Game Pamphlet

OVERVIEW

This is a competitive team-based sketch and guess game where players race to interpret a single visual clue and claim process cards from a shared 5x5 grid. Teams are formed and each round a Lead Designer is chosen to draw a quick sketch under a strict sixty-second timer. Before drawing, the sketcher selects one or more target cards from the grid, each with a point value that reflects its difficulty. The sketcher must communicate the chosen ideas using only images, with no words, letters, numbers, or gestures allowed. After the sketch is revealed, teammates discuss the drawing and make guesses, with a maximum number of guesses equal to the number of intended cards plus one. Correct guesses allow the team to take or flip those cards and continue until their guesses run out. The game continues until all cards have been claimed and the team with the highest total point value wins.

1. Lay out 25 shuffled process cards in a 5x5 grid.
2. Randomly assign teams (each with 2+ players)
3. Each team chooses a Lead Designer (sketcher) for the round.
4. Provide lead designer with a sketch pad/board and markers.
5. Place the timer where all can see it.

Clue Phase:

1. The Lead Designer looks at the process cards on the grid.
2. They pick 1 or more cards that they want teammates to guess.
3. Higher difficulty cards have a higher point value.
4. Set the timer for 60 seconds (or your preferred limit).
The sketcher has only that long to draw one sketch (no words, letters, numbers, or gestures).

Guessing Phase:

5. Teammates review the single sketch and discuss (if more than two players per team).
6. They call out guesses, choosing from the grid.
7. Number of guesses: up to the number of intended cards plus one.
8. Correct guess: Team can take/flip the card, keep guessing if you have remaining guesses.
9. First team to have the most points once all cards are taken/flipped wins.
